

Assignment 2: Make Changes and Commit

1. Create index.html:

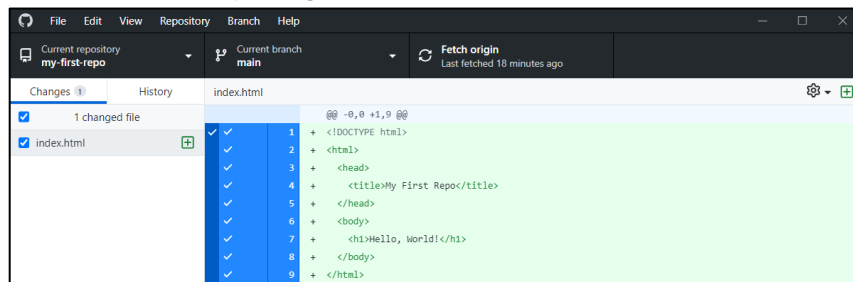

- Open the **repository folder** in your code editor.
- Create a **new file** named **index.html** and add the following code:

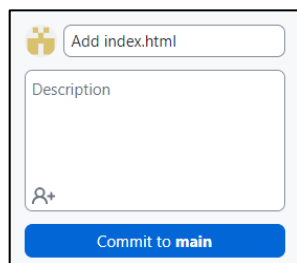

```
1 <!DOCTYPE html>
2 <html>
3   <head>
4     <title>My First Repo</title>
5   </head>
6   <body>
7     <h1>Hello, World!</h1>
8   </body>
9 </html>
10
```

2. Commit and push:

- In **GitHub Desktop**, stage the **index.html** file.

- Write a **commit message**, e.g., "**Add index.html.**"

- Click "**Commit to main**" and then "**Push origin.**"
